Package Success Rate

53%

74%

85%

Cumulative success rate: Refers to your total chance of achieving pregnancy from one package and all embryo transfers – resulting from one or more attempts.

Deposit for the Egg donation packages: €2,000

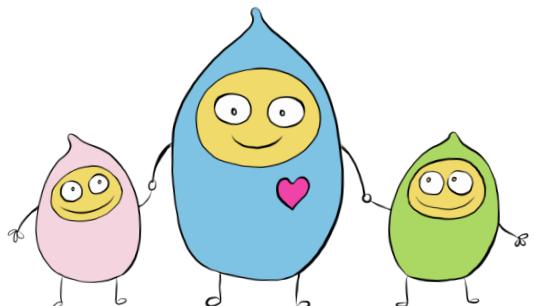

Not included:

- Medications for recipient (included only in Premium package): €100 – €150
- Frozen embryo transfer (if you have frozen embryos): €990

Administration Fee

In the event of a cancelled cycle, an administration fee of €300 applies. This fee is always non-refundable and does not cover the cost of tests.

The Egg Donation Packages Guarantee

In the case of the Basic Package, if at least one embryo suitable for transfer is not yielded, a new cycle will be offered free of charge. The Basic Package is available only with frozen donor eggs. In the case of the Comfort / Premium Package, if the guaranteed number of blastocyst-stage embryo(s) is not yielded, the client has the right to request one or two blastocyst-stage embryo(s) free of charge (depending on the package), to be created and transferred within 12 months after the first transfer. This transfer will be a FET (frozen embryo transfer). If no blastocyst is yielded, as per the Comfort / Premium Package guarantee, a new cycle will also be provided free of charge.

For Comfort and Premium Packages, treatment may be performed either with fresh or frozen donor eggs, depending on client preference. If the original donor is not available, eggs from another suitable donor may be used.

If you benefit from two Comfort / Premium packages and they are not successful (confirmed heart beat), a third one will be offered free of charge in the form of the Basic package. Please note, any frozen embryos remaining from previous packages must be used before the third one may commence.

For the guarantee to apply, sperm must be of sufficient quality (not in a state of oligoasthenoteratozoospermia). The guarantee does not apply if surgically retrieved sperm (e.g. MESA/TESE) is used. The client must not suffer from any serious autoimmune disease or clinically significant uterine fibroid(s) / uterine myomatosis.

Who are our egg donors?

All our donors are **healthy young women aged 18–33**, thoroughly screened and highly motivated to help others build a family.

They undergo:

- full medical and genetic screening,
- infectious disease testing (HIV, hepatitis B/C, syphilis),
- psychological evaluation,
- and provide detailed personal background (education, hobbies, physical traits).

Donors remain anonymous, but you can choose based on their **profile characteristics** – from eye colour to personal interests.

How long will you be in Prague?

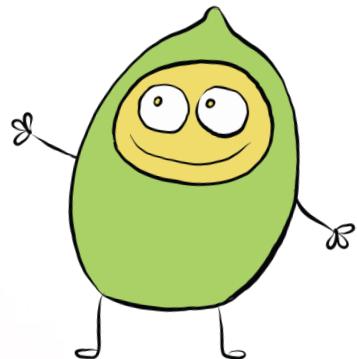

The length of your stay depends on your treatment plan:

With fresh sperm: approximately 7–10 days

With frozen sperm: 2 visits – a personal consultation and embryo transfer only – around **2–3 days**

We'll help tailor your timeline to fit your schedule and make sure your visit is as smooth as possible.

Consultations and pre-treatment tests are completely free of charge.

What will be required before treatment?

For both partners:

- Signed informed consent forms
- STD test results (HIV, hepatitis B/C, syphilis)
- Blood group and Rh factor

For women:

- Pelvic ultrasound of the uterus and fallopian tubes
- Hormone levels: TSH and PRL
- PAP test

If over 40: Breast examination (external provider)

Recommended: ureaplasma, mycoplasma, and chlamydia smear test

For men:

- Semen analysis (spermogram)

We'll provide a checklist and help arrange any tests needed.
